

The total mileage of vehicles using GMS’s FinTech service reaches “100 million km (About 2,500 laps around the earth)”

Global Mobility Service Inc. (Headquarters: Minato-ku, Tokyo; President Director / CEO: Tokushi Nakashima; hereinafter referred to as “GMS”) has reached “100 million km (About 2,500 laps around the earth)” of the total mileage of vehicles using GMS's FinTech service.

There are 1.7 billion people without access to financial services in the world. Many people who had previously been unable to buy a car due to poverty or low income were able to own a car for the first time with GMS's FinTech service. The value of “100 million km” is a proof that the drivers have gained employment opportunities and have been working with great value. GMS will continue to accelerate its business growth, with the encouragement that it has surpassed 100 million km.

As a global startup specializing in financially inclusive FinTech from Japan, GMS works towards realizing a system in which every individual is correctly evaluated for their work. Through our vision, “Through the provision of mobility service, we make people happy”, we create economic rationality while solving social issues including poverty, which is recognized as the most important issue among the SDGs. We will promote a truly “sustainable” business model and contribute to local societies through our activities in Japan and ASEAN countries.

Please look forward to the future efforts of GMS.

■ Overview of Global Mobility Service Inc.

GMS has built a FinTech service model that utilizes the IoT device "MCCS*1" enabling remote start control of proprietary vehicles and the mobility service platform "MSPF *2", and provided them to the Japanese and ASEAN markets. We joined Keidanren (Federation of Economic Organizations) in March 2019 and have attracted attention as a business model with high affinity with Society 5.0 for SDGs. Also, Nakashima was elected as a member of the "SDGs Management / ESG Investment Study Group" of the Ministry of Economy, Trade and Industry and contributed to publish the "SDGs Management Guide". This GMS model has been highly evaluated as a model case project for achieving the SDGs.

*1 "MCCS" is an abbreviation for Mobility-Cloud Connecting System, a device which identifies the location of the vehicle. This system enables safe control and remote operation of the engine.

*2 "MSPF" is an abbreviation for Mobility Service Platform, which allows management, control, data analysis etc. of the vehicles.
