

**Global Mobility Service’s
"Financially Inclusive FinTech Service from Japan to save the 1.7 Billion Poor and Low-income People in the World"
Receives the highest award of Minister of Economy, Trade and Industry Award (Grand Prize) at the 8th Platinum Vision Awards
-A First in the FinTech Service Industry-**

Global Mobility Service, Inc. (Headquarters: Minato-ku, Tokyo; President/CEO: Tokushi Nakashima; hereinafter referred to as "GMS") is proud to announce that its "Financially inclusive FinTech from Japan to save the 1.7 Billion Poor and Low-income People in the World" has been awarded the Grand Prize of METI (Ministry of Economy, Trade and Industry of Japan) Minister’s Award at the Platinum Vision Awards hosted by the Platinum Society Network. It is the highest award given and is considered a 'first' in the FinTech service industry.

The Platinum Society Network was founded by Hiroshi Komiyama, the former president of the University of Tokyo. Brought by the new possibilities and solutions to the challenges that Japan faces as an advanced country, the organization aims to create a “Platinum Society”, a dignified society with abundant resources and comfort that lasts long with the brilliance of platinum. The Platinum Vision Award honors entities that have solved regional challenges through the creation of a new industry or other ingenious measures that leads to the embodiment of the “Platinum Society”.

The "Financially Inclusive FinTech Service from Japan to save the 1.7 Billion Poor and Low-income People in the World" by GMS provides a solution to the global concern that is currently being faced in this COVID-19 pandemic such as poverty in the developing countries, the disparities between an advanced country and a developing country, and the widening gap between the rich and the poor in advanced countries. The fact that GMS’s effort in creating the “Platinum Society” has not only covered

Japan, but has also involved activities overseas taking a global stance in solving the issue was highly appreciated the awarding committee which lead to receiving this prestigious award of Minister of Economy, Trade and Industry Award (Grand Prize).

Taking this award as an opportunity, GMS will give its best efforts in creating a “Platinum Society” by working with proactive local government units to resolve the issues faced by regional financial institutions and residents.

As a global startup specializing in financially inclusive FinTech from Japan, GMS works towards realizing a system in which every individual is correctly evaluated for their work. Through our vision “We make people happy through the provision of mobility service,” we create economic rationality while solving social issues including poverty, which is recognized as the most important issue among the SDGs. We will promote a truly “sustainable” business model and contribute to local societies through our activities in Japan and ASEAN countries. For more information about our business, please see this video. (https://youtu.be/UV_QIm1w-lc)

Please look forward to the future efforts of GMS.

■About Global Mobility Service Inc.

GMS has built a FinTech service model that utilizes the independently developed IoT device "MCCS*1" and the Mobility Service Platform "MSPF*2" to enable remote start control of vehicles and provides it to the Japanese and ASEAN markets. GMS joined Keidanren in March 2019, attracting attention as a business model with a high affinity with Society 5.0 for SDGs. Representative Nakashima was selected as a member of the Ministry of Economy, Trade and Industry's “SDGs Management / ESG Investment Study Group” and has contributed to the publication of the “The Guide for SDGs Business Management”.

*1 Abbreviation for Mobility-Cloud Connecting System, which is a system that specifies the location information of a car, remotely controls the activation of the car's engine safely, and enables sensing.

*2 Mobility Service Platform is a platform system that performs management, control, data analysis, etc. for mobility, and enables collaboration with external systems via the Open API on the cloud.
