

**The total mileage of vehicles using GMS’s FinTech service reaches
“200 million km (About 5,000 laps of the Earth)”**
<https://www.global-mobility-service.com/>

Global Mobility Service Inc. (Headquarters: Minato-ku, Tokyo; President/CEO: Tokushi Nakashima; hereinafter “GMS”), a FinTech startup committed to financial inclusion by providing IoT-based credit-creating services to the world's 1.7 billion poor and low-income people who cannot afford to own a car, has announced that the total mileage of vehicles using its FinTech service has reached “200 million km (About 5,000 laps of the Earth)”.

Many people who had previously been unable to buy a car due to poverty or low income were able to own a car for the first time with GMS's FinTech service. The value of “200 million km” is proof that the drivers have gained employment opportunities and have been working with great value. GMS will continue to accelerate its business growth, with the encouragement that it has surpassed 200 million km.

As a global startup specializing in financially inclusive FinTech from Japan, GMS works towards realizing a system in which every individual is correctly evaluated for their work. Through our vision, “Through the provision of mobility service, we make people happy”, we create economic rationality while solving social issues including poverty, which is recognized as the most important issue among the SDGs. We will promote a truly “sustainable” business model and contribute to local societies through our activities in Japan and ASEAN countries. Please watch the video to see GMS’s effort toward SDGs (<https://youtu.be/A0sU6EGaAXY>).

■About Global Mobility Service Inc.

With our vision "We create a system in which all hard workers are recognized", GMS is a fintech startup working for financial inclusion by creating credit for the 1.7 billion poor and low-income people in the world. By analyzing vehicle data (driving status, speed, etc.) collected by the MCCS, an IoT device equipped with technology to remotely control vehicles, and financial data (payment status, etc.) obtained in conjunction with financial institutions, we visualize the creditworthiness of drivers and create opportunities to utilize financial services such as loans and leases for those who are unable to qualify for conventional credit screening. As of October 2020, we have raised a cumulative total of 5.6 billion yen in recognition of our business model of addressing social issues by creating job opportunities for poor and low-income people in Japan and in ASEAN countries (Philippines, Cambodia, and Indonesia). We will continue to contribute to the international community towards the realization of a prosperous society through a business model that creates economic rationality in solving problems such as poverty.
