

**Diving in full-scale business development in Japan from 2019,
Vehicles using GMS FinTech service exceeds “5,000 units”**

<https://www.global-mobility-service.com/en/>

Helping to provide financial access towards the 1.7 billion poor and low-income population who cannot afford cars, Global Mobility Service Inc. (Headquarters: Minato-ku, Tokyo; President/CEO: Tokushi Nakashima; hereinafter referred to as "GMS"), a financial inclusion type FinTech startup that provides credit creation services by utilizing IoT technology is proud to announce that the number of vehicles using GMS FinTech service in Japan has exceeded “5,000 units”.

As the issue of relative poverty grows in Japan, it is estimated that there are 2 million people a year who cannot utilize ordinary car loans and leasing. For example, non-regular employees,

foreign workers with no permanent residency, and those who have just started their own business are all working diligently. However, due to their lack of credit, they cannot make use of loans or leases to purchase and own the car they need for their work.

In aim to give service to them, from April 2019, GMS has been providing various auto-financing such as private car loans for commuting and light van leasing for delivery drivers of sole proprietors in Japan, in cooperation with regional banks, credit sales companies, financial institutions, and car dealers all over Japan as GMS expands and develops its business. As the effects of the COVID-19 pandemic continue to prolong, the disparity is widening in Japan. Thus, we will continue to expand alliances with financial institutions and car dealers to further accelerate and develop our business for the hard-working drivers.

As a global startup specializing in financially inclusive FinTech from Japan, GMS works towards building a fairer world that values workers equally. Through our philosophy “We make people happy through the provision of mobility service,” we create economic rationality while solving social issues including poverty, which is recognized as the most important issue among the SDGs. We will promote a truly “sustainable” business model and contribute to local societies through our activities in Japan and ASEAN countries. For more information about our business, please see this video (<https://youtu.be/OD7SvnoRYAo>).

Please look forward to the future efforts of GMS.

■About Global Mobility Service Inc.

With our vision "Build a fairer world that values workers equally", GMS is a FinTech startup working for financial inclusion by creating credit for the 1.7 billion poor and low-income people in the world. By analyzing vehicle data (driving status, speed, etc.) collected by the MCCS, an IoT device equipped with technology to remotely control vehicles, and financial data (payment status, etc.) obtained in conjunction with financial institutions, we visualize the creditworthiness of drivers and create opportunities to utilize financial services such as loans and leases for those who are unable to qualify for conventional credit screening.

As of October 2020, we have raised a cumulative total of 5.6 billion yen in recognition of our business model of addressing social issues by creating job opportunities for poor and low-income
