

**Global Mobility Service Expands Scope of Certification of International Standard
for Information Security Management System (ISMS) to Entire Company**

**Enhancing Security to Accelerate Cooperation
with Financial Institutions and Finance Companies**

<https://www.global-mobility-service.com/en/>

Global Mobility Service Inc. (Headquarters: Minato-ku, Tokyo; President/Founder: Tokushi Nakashima; hereinafter "GMS") has acquired certification of ISO 27001 (ISO / IEC 27001:2013 & JIS Q 27001:2014), an international standard for Information Security Management System (ISMS) for the whole company.

IS 711302 / ISO 27001

As a company providing FinTech services, GMS handles important information received from its clients. GMS has now expanded its ISO 27001 (ISO/IEC 27001:2013 & JIS Q 27001:2014) certification for the whole company in addition to the Technical Division and Business Division, which had previously acquired this certification. We will continue to strive to maintain and improve our information security management system so that more customers, including financial institutions and finance companies, are able to use our services with a greater sense of security, and to further enhance the trust of our stakeholders.

Certification registration number : IS 711302

As a global startup specializing in financially inclusive FinTech from Japan, GMS works towards building a fairer world that values workers equally. Through our philosophy "We make people happy through the provision of mobility service," we create economic rationality while solving social issues including poverty, which is recognized as the most important issue among the SDGs. We will promote a truly "sustainable" business model and contribute to local societies through our activities in Japan and ASEAN countries. For more information about our business, please see this video (<https://youtu.be/OD7SvnoRYAo>).

Please look forward to the future efforts of GMS.

■About Global Mobility Service Inc.

With our vision "Build a fairer world that values workers equally", GMS is a FinTech startup working for financial inclusion by creating credit for the 1.7 billion poor and low-income people in the world. By analyzing vehicle data (driving status, speed, etc.) collected by the MCCS, an IoT device equipped with technology to remotely control vehicles, and financial data (payment status, etc.) obtained in conjunction with financial institutions, we visualize the creditworthiness of drivers and create opportunities to utilize financial services such as loans and leases for those who are unable to qualify for conventional credit screening.

As of October 2020, we have raised a cumulative total of 5.6 billion yen in recognition of our business model of addressing social issues by creating job opportunities for poor and low-income people in Japan and in ASEAN countries (Philippines, Cambodia, and Indonesia). We will continue to contribute to the international community towards the realization of a prosperous society through a business model that creates economic rationality in solving problems such as poverty.
