

Total Mileage of Vehicles Using GMS’s FinTech Service Worldwide Exceeds “300 million km (About 7,500 Laps of the Earth)”

<https://www.global-mobility-service.com/en/>

Helping to provide financial access towards the 1.7 billion poor and low-income population who cannot afford cars, Global Mobility Service Inc. (Headquarters: Minato-ku, Tokyo; President/Founder: Tokushi Nakashima; hereinafter referred to as "GMS"), a financial inclusion type FinTech startup that provides credit creation services by utilizing IoT technology is proud to announce that the total mileage of vehicles using GMS's FinTech service has exceeded “300 million km (about 7,500 laps of the earth)”.

Many people who had previously been unable to buy a car as they could not get access to financial services due to poverty or low income were able to own a car for the first time with GMS's FinTech services. The figure of "300 million km" is proof that our drivers have been working diligently day in and day out without giving up, despite the lingering effects of COVID-19. As the pandemic gradually settles down and economic activities resume in many countries, GMS will continue to accelerate its business growth while working closely with our drivers.

As a global startup specializing in financially inclusive FinTech from Japan, GMS works towards

building a fairer world that values workers equally. Through our philosophy “We make people happy through the provision of mobility service,” we create economic rationality while solving social issues including poverty, which is recognized as the most important issue among the SDGs. We will promote a truly “sustainable” business model and contribute to local societies through our activities in Japan and ASEAN countries. For more information about our business, please see this video (<https://youtu.be/cDO7GUvn1zM>).

Please look forward to the future efforts of GMS.

■About Global Mobility Service Inc.

With our vision "Build a fairer world that values workers equally", GMS is a FinTech startup working for financial inclusion by creating credit for the 1.7 billion poor and low-income people in the world. By analyzing vehicle data (driving status, speed, etc.) collected by the MCCS, an IoT device equipped with technology to remotely control vehicles, and financial data (payment status, etc.) obtained in conjunction with financial institutions, we visualize the creditworthiness of drivers and create opportunities to utilize financial services such as loans and leases for those who are unable to qualify for conventional credit screening.

As of October 2020, we have raised a cumulative total of 5.6 billion yen in recognition of our business model of addressing social issues by creating job opportunities for poor and low-income people in Japan and in ASEAN countries (Philippines, Cambodia, and Indonesia). We will continue to contribute to the international community towards the realization of a prosperous society through a business model that creates economic rationality in solving problems such as poverty.
